Expanko, Inc Announces FloorScore Certification for Fritztile Terrazzo Tile

For Immediate Release: Expanko, Inc announces that its newest line, Fritztile Flexible Terrazzo Tile, has achieved FloorScore Certification, continuing the company's tradition of providing environmentally sensitive, commercial-friendly flooring products.

FloorScore is a voluntary third-party certification that tests and certifies flooring products for compliance with indoor air quality emission requirements of the California Section 01350 program. Developed by the Resilient Floor Covering Institute (RFCI) in conjunction with Scientific Certification Systems (SCS), FloorScore tests and certifies hard surface flooring and flooring adhesive products for compliance with rigorous indoor air quality emissions requirements. Individual volatile organic compounds (VOCs) are evaluated using health-based specifications.

“Obtaining the FloorScore certification is an important demonstration of Fritztile’s continued commitment to develop flooring solutions designed with the commercial interior designer in mind. FloorScore has long been established as the industry standard for Indoor Air Quality excellence and is an important distinction in the commercial design community. ” says Randy Gillespie, Senior VP of Marketing and Sales for Expanko, Inc.

About Fritztile by Expanko, Inc

Fritztile Flexible Terrazzo Tiles offer a unique alternative to poured-in place terrazzo and other hard surface floors. Fritztile is not only affordable, but offers an industry leading life-cycle cost, FloorScore certification, high recycled content, Class 1 Fire rating and a quiet, durable floor that will be beautiful throughout the lifetime of the structure. The custom color capabilities of Fritztile make the design possibilities with the product truly endless.
